Compared to last week's market; all weight class averages of both feeder steers and heifers ended fully $3 to $5 lower. Slaughter cows and slaughter bulls also trended lower and finished about $3 off last week's figures.

Even with last Friday's positive on feed report, today's buyer aggression was somewhat softer In front of tomorrow's USDA grain report. As mentioned the western part of the corn belt is facing its pollination under abnormally dry conditions and makes up about 35% of the US corn planting. The corn crop is at a critical stage and will no doubt have a significant bearing on future calf prices.
