

The Chick Story

Materials

- Scissors (1 pair per student)
- Colors
- Pencil
- Stapler
- Egg and chick patterns, copied onto construction

Directions

Directions:

Tell students they will imagine they are a chick hatching from an egg.

On the lines included on the egg pattern, have students write a story about what they saw, felt,

and did before and after hatching (Figure 1). Students then will cut out their egg story on the bold lines.

Now have students color the chick on their chick pattern and cut it out, following the bold line marked by arrows. Students may

leave a tab at the top of the chick to make inserting/removing the chick easier. Have students staple the front and back of their egg pattern at the points indicated by dashes (Figure 2), then insert their colored chick pull-out (Figure 3).
