# Urban and Homeowner Soil Sample Information Form

Please submit this completed form and payment with samples. Mark each sample bag with your sample identification and ensure that it corresponds with the sample identification written on this form. *See sampling and mailing instructions on the back of this form.

(PLEASE DO NOT SEND CASH)

**SUBMITTAL AND INVOICE INFORMATION:** This information will be used for all official invoicing and communication.

Name ____________________________  County where sampled ____________________________

Mailing Address ____________________________  Phone ____________________________

City ____________________________  State ________  Zip ________  Email* ____________________________

**CLIENT NAME:** Client name will only be included with information above on result reports.

Name ____________________________

Lab Use only

*A $2.00 mail fee will be charged for all invoice and sample results mailed via USPS. Results and invoice can be emailed in PDF form for free.

We strongly suggest emailing the laboratory at soiltesting@tamu.edu prior to shipping your samples. This will provide the laboratory a valid email address for returning your results and invoice. Bounced emails will be billed $2 and a hardcopy will be mailed to the address listed above.

### Annual, Flowers and Gardens
- A. Azaleas and Camellias
- B. Roses
- C. Annuals
- D. Vegetable Garden
- E. Other

### Turfgrass
- F. Common Bermudagrass
- G. Hybrid Bermudagrass

### Trees and Woody Ornamentals
- K. Tall Fescue
- L. Kentucky Bluegrass
- M. Pecan trees
- N. Fruit trees
- O. Shrubs and Ornamentals
- P. Shade trees
- Q. Other trees

1. **Routine Analysis (R)** (12)
   - Includes Test 1 plus detailed salinity analysis (Recommended for individuals applying compost and manures.)
   - $12 per sample

2. **R + Micronutrients (Micro)** (30)
   - Adds Zn, Fe, Cu, and Mn to Test 1.
   - $19 per sample

3. **R + Micro + Boron (B)** (3)
   - Includes Test 2 plus boron (Recommended for individuals applying compost and manures.)
   - $26 per sample

4. **R + Detailed Salinity/EC** (4)
   - Includes Test 2 plus detailed salinity analysis (Recommended for individuals using lower quality irrigation water.)
   - $34 per sample

5. **R + Micro + Detailed Salinity/EC** (5)
   - Includes Test 2 plus detailed salinity analysis (Recommended for individuals using lower quality irrigation water.)
   - $41 per sample

6. **Routine Analysis + Organic Matter** (19)
   - Includes Test 1 plus organic matter analysis
   - $32 per sample

7. **R + Micro + Organic Matter** (18)
   - Includes Test 2 plus organic matter analysis
   - $39 per sample

8. **R + Micro + B + Organic Matter** (13)
   - Includes Test 3 plus organic matter analysis
   - $46 per sample

9. **R + Texture (determines % sand, silt, and clay)** (7)
   - Includes Test 1 plus textual analysis
   - $32 per sample

10. **R + Micro + Texture (11)**
   - Includes Test 2 plus textural analysis
   - $39 per sample

11. **R + Micro + B + Organic Matter + Detailed Salinity** (14)
   - Includes Test 2 plus detailed salinity analysis
   - $68 per sample

   - Includes Test 2 plus textural analysis and detailed salinity and provides the most comprehensive data needed for troubleshooting most plant soil growing issues (does not address pathogen, pesticide or hydrocarbon issues))
   - $88 per sample

Hardcopy mailed to address listed above $2 per invoice

Pricing valid until 12-31-2019.

The latest form can be downloaded at the laboratory’s website: soiltesting.tamu.edu
TAKE A SOIL SAMPLE FOR FERTILIZER RECOMMENDATIONS

Where to sample

- A soil sample should represent a given area of your lawn or garden that is treated or used similarly (for example, front yard, back yard, planting bed, garden and etc.).
- Sample areas separately if you observe distinct differences in slope, soil texture (for example sandy areas versus clayey) or water drainage.
- The laboratory does not provide analyses for heavy metals, microbial communities, pesticides or other non-traditional plant-nutrient management uses.

Collecting a soil sample

- Using a trowel or similar tool, scrape away any non-decomposed plant tissue and materials.

- Next, cut a core or divot 6 inches deep into the soil and place soil in a clean plastic container. Repeat this step 8 to 10 times in the lawn or garden which is being considered for testing.

- Mix all collected soil thoroughly, removing any roots or other visible plant materials and place 2-3 cups of soil in a quart-sized re-sealable heavy gauge plastic bag. Air-dry soil if sample feels wet to the touch.

- Label the bag with a permanent marker, clearly identifying each bag with a simple sample ID matching those used on the front side of this.

Mailing your soil sample

- Complete the information form on the front page (this information is required for you to receive fertilizer recommendations that are based on your soil test results). Incomplete information (e.g., lack of name, address, crop information and etc.) may result in delay of testing or receipt of results.

- Payment must be included with samples, prepaid on Aggie Marketplace or a completed AG-257 must be on file for samples to be processed. Go to the laboratory website for easy access to the Aggie Marketplace payment option. Please note that the price is per sample. The AG-257 is attached or can be located at https://agrilifeas.tamu.edu/documents/ag-257.pdf/

- Place the plastic sample bag, completed submittal form, and your check or money order for the appropriate fees in a box or padded envelope and send to: United States Postal Service Other Couriers (FedEx, UPS and etc.)
