Tomatoes	Transplants			▧	■		
Turnips	Seeds		■				
Watermelon	Seed/Transplant			▧	■		

## Please Note

Dashed line indicates average last frost (April 1- April 10). Late frosts may occur in low areas. Shaded gray cells indicate marginal planting times; meaning it's possible to grow the plant during this time, but it won't produce to its peak or may suffer risk of frost. If growing vegetables for the Gillespie County Fair, use date of maturity from seed package/plant tag and count back the number of days listed, plus two weeks, to determine when to plant it.

# Gillespie County Fall Garden Planting Schedule

## Please Note

Dashed line indicates average first frost (Fredericksburg area is November 21-30, west of Fredericksburg and in the hills is November 11-20). Shaded gray cells indicate marginal planting times; meaning it's possible to grow the plant during this time, but it won't produce to its peak or may suffer risk of frost. Early frosts may occur in low areas.
