

Handwashing can prevent

1 in 3
cases of diarrhea

1 in 5
respiratory infections,
such as a cold or the flu

Give frequent reminders

Building handwashing skills takes time. At first, your child will need regular reminders of how and when to wash hands. It is especially important to remind children to wash their hands after using the bathroom, before eating, after touching pets, after playing outside, and after coughing, sneezing, or blowing their nose. But once handwashing becomes a habit and a regular part of your child's day, they will practice it throughout their lives.

What if soap and water aren't available?

Washing hands with soap and water is the best way to get rid of germs. If soap and water are not readily available, use an alcohol-based hand sanitizer that has at least 60% alcohol.

Did you know?

Baby wipes may make your hands look clean, but they're not designed to remove germs from your hands. CDC recommends washing hands with soap and water when possible.

Remember to make handwashing a healthy habit at home, school, and at play!
