

# Blue Mist

*'Eupatorium'*

**Sun/Partial Shade**

**3' Tall**

**Perennial**

**Fuzzy Blue Flowers**

**Attracts Butterflies**

**Culture:** Blue Mist is adapted to most soil types, but is especially suited well drained soil. It is a popular plant for home gardens but can become invasive.

**Growth Habit:** It flowers in spring and summer, but it is in the fall that it puts on its most magnificent show, attracting Queen butterflies, migrating Monarchs and many others

**Bloom:** The bloom has a blue flower and readily works well as a filler or groundcover.

**Notes:** This plant spreads quickly. It's also easy to divide and move to a new area after the last frost

***Blue Mist 'Eupatorium' can be viewed in the Master Gardener's Demonstration Garden located behind Hood County Annex 1 on 1410 W. Pearl St, Granbury, Texas***
