

# Salvia Evolution

*Salvia farinacea Evolution*

***Full Sun***

***2'tall and spreads 16 – 19 inches***

***Flowers spike to be 6 – 7 inches long***

***Dark purple blooms,***

***May-October***

***Culture:*** Salvia Evolution prefers full sun. Salvia farinacea Evolution has tested well in drought tolerant areas and shows minimal pest problems. It will even keep blooming when not deadheaded.

***Growth Habit:*** This plant has 6 – 7 inch bloom on a sturdy little plant packed with deep violet-purple blooms. They begin in early to midsummer and keep going into fall, extending your season of color.

***Bloom:*** Salvia Evolution will grow up to 2 feet tall and spreads 16 – 19 inches. Expect the flower spikes to be about 6 -7 inches long.

***Notes:*** Salvia Evolution is a whole new generation for Salvia, with blooms, far brighter and less prone to fading than older varieties.

***Salvia Evolution can be viewed in the Master Gardener's Demonstration Garden located behind Hood County Annex 1 on 1410 W. Pearl St, Granbury, Texas***
