CABBAGE

- Can be used as an ornamental
- Cool-Season vegetable
- Likes rich soil, plenty of water, and good fertilization
- Comes in a variety of colors

CHRYSANTHEMUM

- Native to China
- Does well indoors and outdoors
- Longest lasting cut flower
- Emits a large amount of ethylene gas
- Loves full sun or a sunny window

SWISS CHARD

- Cut back when it reaches a foot tall to maintain flavor
- Full to part sun
- Nutritional powerhouse - vitamins A, K, & C. Also a good source of magnesium, potassium, iron, and dietary fiber

WILD FLOWERS

- Plant seeds in late summer to early fall
- Prefers full sun
- Seeds need ground contact and water to germinate
- Wildflower mixes work well throughout Texas

PANSIES

- Variety of colors
- Grows well in sun and even partial shade
- Grows best in temperatures of 45-75 degrees Fahrenheit, but can survive temperatures as low as -10 F

KALE

- Cold-hardy and resilient
- Fall is the best time to plant in our area
- Often used as an ornamental
- When weather is warm, it produces yellow flower stalks that can be used as cut flowers
