VALUE

Crop and Forage Production Education

Texas A&M AgriLife Extension Service programs targeted to producers of crops and forages are increasing profitability and productivity of farmers, thereby helping to build and sustain rural economies and support jobs.

VALUE

Food Safety Education

Both those who work in food-service establishments and those who simply cook in their own kitchens benefit from Texas A&M AgriLife Extension's food-safety education programs. The resulting improvement in safe food handling benefits consumers by helping prevent food-borne illnesses and the public health care costs they cause.
