Grimes & Waller County New/Small Landowners

The Multi-County New Landowner Education program is a series of 5 informational meetings, seminars, and field days designed to make new/small landowners in Grimes & Waller Counties aware of what types of agricultural enterprises are best for their property. Participants in the program will hear from experts in a variety of fields in agriculture about best management practices that can be implemented on their own property. This innovative program assists new landowners in understanding the concepts of rural living. Participants in the program are given exposure to ideas on raising livestock and horses, plant identification, applying pesticides, soil testing, stock pond management, pond construction, and much more. The program also serves as a way for new residents of the two counties to network and meet new people in their communities, find out what can be done on their land, what operations can be successful, and possibly what opportunities they have to serve the community.

The programs will be held on the fourth Thursday of the months of April and May and July through September. Each month's meeting will be held at different locations in one of the two counties. The meetings begin at 1pm and will last until 4pm. The cost for the program series is \$60 per person, \$80 per couple for all five meetings, \$20 per person per meeting. Continuing Education Units (CEU's) for pesticide applicators will be offered as they are applicable. Refreshments will be provided at every meeting.

- ◇ April 23rd – Meet your local Resources (Grimes County)
- ◇ May 28th – Pond Management & Feral Hogs (Waller County)
- ◇ July 30th – Viticulture & Bees (Grimes County)
- ◇ August 27th – Fruit Trees, Pecans and Citrus (Waller County)
- ◇ September 24th – Private Applicator Information, Weed control and IPM (Grimes County)

The first meeting for the 2020 series will take place on Thursday, April 23rd, 2020 in Grimes County, location TBD. Our initial session will provide an overview of the program, share information for local resources, and provide participants with an opportunity to learn more about the fundamentals of getting started with managing their property. Appraisers from each county will also be on hand for individual county breakout sessions to help answer questions related to Ag/Wildlife Tax Valuation for participants. This is a great opportunity to network with other new landowners and learn about resources that can be of great assistance to you in establishing an agricultural or wildlife exemption for your property. Don't miss this wonderful opportunity!

For more information please contact the Texas A&M AgriLife Extension Office in Grimes County at 936-873-3907 or Waller County at 979-826-7651. You can RSVP at <https://waller.agrilife.org/rsvp/> or call one of the Extension Offices. See the flier in the back of the newsletter.

Master Gardeners News

New Intern classes are currently being finalized. If you are interested in becoming a Master Gardener please contact the Extension Office and Ask to speak to a Master Gardener, 979-826-

7651 ext.3068.

We are offering Saturday classes beginning January 18, 2020 including over 50 hours of gardening education led by experts from Texas A&M and special guest speakers plus hands on training and private tours during our field trips!

If you have not applied, please see the link below to our website.

<https://txmg.org/wallermg/training/>

This link will bring you to the flyer with all the relevant dates, intro letter, and application as well as an online pay option. You are also welcome to mail your payment with your application.

Ask us about our "Go Green" discount when you register with a friend or family member!

Please contact us by phone or email if you have questions or would like to discuss our "Go Green" discount before you register. If you have any questions please call a Master Gardener at 979-826-7651.

Certification Includes:

- 50+ Hours of Gardening Education
 - Earth-Kind Landscaping
 - Plant Development
 - Plant Propagation
 - Soil Characteristics
 - Soil Improvement
 - Water
 - Ornamental Plants
 - Lawn Care
 - Vegetables & Herbs
 - Fruit Trees, Berries, & Nuts
 - Landscape Design
 - Integrated Pest Management
 - Diseases
 - Insects
 - Weeds
- Hands on Workshops
- Master Gardener Manual
- Refreshments
- Garden Tours

- ◆ Background Screening Required
- ◆ Must be able to Provide One Transportation to Supplement Garden Tour Field Trips

Texas A&M AgriLife Extension is an equal opportunity employer and program provider. The Texas A&M University System, U.S. Department of Agriculture, and the County of Commissioners Courts of Texas are participating.

We work to provide reasonable accommodations for all persons with disabilities for the program and ask that you notify the Waller County AgriLife Extension Office of the disability and/or service that will be required.

WCMG Present: Lunch & Learn

The Waller County Master Gardeners would like to invite the public to our new speaker series. We are calling this series "Lunch & Learn". Our first presenter will be Mary Karish, a Waller County Master Gardener, speaking about air layering.

Have you ever worried about inadvertently buying diseased fruit trees or wanting to propagate your favorite fruit tree but having trouble finding good rootstock or scions? Air layering is your answer.

There are various ways of propagating fruit trees. In this session, Mary Karish will demonstrate how to air layer, using a branch of a fruit producing tree. She will also discuss selection of good scions and demonstrate cleft propagation as well.

This presentation will take place on February 11, 2020, from 11:30-12:30 at the Waller County AgriLife Extension Office. The office is located at 846 6th St in Hempstead. Call 979-826-7651 with questions. The presentation is free and open to the public. A light lunch will be provided, free of charge.

For more information please contact the Texas A&M AgriLife Extension Office Waller County at 979-826-7651. Please RSVP at <https://waller.agrilife.org/rsvp/> or call the Extension Offices or e-mail: waller-mgardener2013@gmail.com for lunch count purposes.

WCMG: Breakfast Speakers

The Waller County Master Gardeners would like to invite you to our free speaker series. February 6, 2020, Susan Martin will speak on Planting for Pollinators

Susan Martin is a freelance horticultural marketer, writer, speaker and consultant based in West Michigan. Working in numerous branches of the horticulture industry for the past 21 years, she has gained experience in independent garden center and mass merchant sales, merchandising, landscape and container design and installation, new plant development and introduction, branding, and numerous marketing efforts at the trade and consumer levels.

Susan enjoys sharing her passion for plants, gardening and the business of horticulture with her fellow gardeners and colleagues daily. Her home garden has been featured in Garden Gate and State by State Gardening magazines and has received visitors from around the world. She invites you to take a tour through her garden with her at @Gardener Sue's News on Facebook.

The time is 9:00am-10:00 am at the Waller County Extension Office, 846 6th St in Hempstead. The presentation is free and open to the public. To RSVP please visit our website at <https://waller.agrilife.org/rsvp/> or call the office.

5 Hour Recertification CEU Program

Texas A&M AgriLife Extension Office of Brazoria, Chambers, Galveston, Jefferson and Waller County will be hosting a 5-Hour Pesticide Applicator Recertification Program on February 19, 2020 in Waller County. Location is the Hempstead Fire Department, 701 Calvit St., Hempstead, TX 77445

Program registration will begin at 8:30 am with the first presentation scheduled for 9 am and the final presentation ending about 3:030 pm. There will be several CEU credits given for Pesticide (pending approval) TDA: 1-IPM, 1-Laws and Regs, 3-General.

We hope you can join us for this top notch, intensive day of training, specially designed to serve the diverse needs of the residents of Southeast Texas. Lunch will be provided with your registration fee. Please RSVP so we have a head count for the meal.

The program is \$35 before each deadline. After deadlines and at the door will be \$40. Please make checks payable to Waller County Livestock & Forage Committee (WCLF). To RSVP or if you have additional questions, please contact Waller County Extension Office at 979-826-7651. You can also RSVP on our website at <https://waller.agrilife.org/rsvp/> for the Waller County program only.

Name that Plant? Singletary Pea

Description

Singletary pea is a legume with winged stems that grow from 10 to 40 inches long. Its compound leaves have two long, narrow leaflets up to 3 inches long and terminate in a branched tendrils. The small, pea-like flowers are red to bluish. Distinctive pods, 1 to 1.5 inches long, are covered with hair attached to small, raised bumps. Each pod contains four to 10 mottled, round seeds.

Habitat

Historically, singletary pea was planted as a cover crop and a cool season forage, often mixed with small grains. It has escaped cultivation and is found in north central and northeastern Texas. It is common along roadsides and in pastures where it has been allowed to go to seed.

Toxic Agent

The vegetation of singletary pea is not toxic and is highly nutritious, but the seeds contain toxic amino acids. Lathyrism, the neurological syndrome most often produced by chronic consumption of the seeds, can affect all species including humans, but horses are the most sensitive. Horses are usually affected by hay containing intact pods with seeds. Bovine cases usually result from grazing pastures with many mature plants.

Signs of Livestock Ingestion

Horses with lathyrism demonstrate these signs: Incoordination of rear legs; Unusual stance with rear legs too far forward; Exaggerated stepping of rear legs; Paralysis of rear legs.

Cattle with lathyrism show: Reluctance to stand; Incoordination of rear legs; Inability to rise

Chronic consumption of seeds of other Lathyrus species result in skeletal deformities in growing animals.

Calves born to cows that have consumed seeds of singletary pea for several months during gestation may have crooked legs and a curved spine.

35th Annual Fort Bend Regional Vegetable Conference

Thursday, February 6, 2020

The 35th annual Fort Bend Regional Vegetable Conference is a celebration of vegetable production along the upper Gulf Coast region. Counties of Waller, Wharton, Harris, Galveston, Brazoria, Colorado, and Austin join with Fort Bend to put on this event focusing on teaching sustainable practices to help producers maximize efficiencies and profitability. We have something for every producer, and as always, we will offer 5 continuing education credits for TDA license holders.

Early Registration: \$30.00; Door Registration: \$35.00

Thru January 22nd

Where: Waller County Extension Office,
846 6th Street, Hempstead, TX 77445

The purpose of this training is to obtain a Private Applicator License from Texas Department of Agriculture. This license will enable the applicator to purchase and apply state limited use and federally restricted chemicals on his land or land he has control of for the purpose of production of agricultural commodities. All farm and ranch operators who do not have a Private Applicator's License to purchase "restricted use" pesticides (such as 2, 4-D, Grazon P+D, Tordon 22K, etc.) will need to attend this training.

If you are interested in obtaining a Private Applicator license, please contact the Waller County office at (979) 826-7651 to RSVP and to purchase the manuals.

2020 TEXAS A&M AGRILIFE EXTENSION

TURFGRASS ECOLOGY & MANAGEMENT SHORT COURSE

March 2 - 6, 2020 | College Station, TX

TEXAS A&M
AGRILIFE
EXTENSION

TEXAS A&M UNIVERSITY
Soil & Crop Sciences

CORE CURRICULUM

Monday, March 2 - Thursday, March 5 (\$595)

The Texas A&M Turfgrass Ecology & Management Short Course is a four-day course designed for turf professionals and enthusiasts looking to expand their knowledge of turfgrass systems and best management practices. This course moves linearly from site preparation and appropriate species selection to establishment, cultural practices, and pest management. Attendees will have the opportunity to learn from a wide range of experts with unique problem-solving perspectives. The objective of this course is to empower turfgrass managers to make confident, well-informed decisions through a combination of applied and theoretical knowledge. Participants will spend time both in the classroom and engaged in group and hands-on activities.

Topics Covered

- Principles of Soil Science
- Soil and Water Testing
- Introductory Turfgrass Physiology
- Turfgrass Identification and Selection
- Site Preparation
- Turfgrass Planting & Establishment
- General Turfgrass Management
- Turfgrass Nutrient Management
- Fertilizer Calculations and Calibrations
- Water Quality Management
- Turfgrass Cultivation Practices
- Integrated Pest Management
- Weed Management for Turf
- Herbicide Resistance
- Insect Identification & Management
- Disease Identification & Management
- Field Scouting and Diagnostic Sampling
- Sprayer Calculations and Calibrations for Pesticide Applications
- Field Tours of Local Turfgrass Facilities

OPTIONAL 5TH-DAY PROGRAM IRRIGATION TROUBLESHOOTING & PERFORMANCE TESTING

Friday, March 6th (\$165)

Lecturers:

Dr. Guy Fipps & Charles Swanson
Texas A&M School of Irrigation

The course includes classroom instructions, laboratory exercise and demonstrations, and hands-on experience in the field by troubleshooting and performance testing an actual irrigation system.

This eight-hour course covers how to:

- evaluate and document site conditions that influence the efficiency of landscape irrigation
- troubleshoot irrigation system components for proper operation
- perform routine maintenance and minor repair/adjustments of irrigation systems to improve performance
- determine station precipitation rate
- develop seasonal irrigation schedules that address site limitations, plant water needs and irrigation system performance

CPTM CERTIFICATION PROGRAM

Short course attendees will also have the opportunity to take the CPTM exam through the Texas Turfgrass Association.

For more information, visit:
